Technologies and Languages

- Languages: JavaScript, TypeScript, Python, HTML, CSS
- Technologies: React, D3.js ,Tailwind CSS, Node.js, Express.js, GraphQL PostgreSQL, Pandas

Projects

SneakerFlex   April 2021–May 2021

- Full stack ecommerce website built in Nextjs and Node using TypeScript
- CRUD app that handles users, authentication, orders, and comments
- Used a PostgreSQL database and GraphQL for the API
- Used Stripe as a payment handler for orders

HoopyDo   Feb 2021–March 2021

- Built an NBA statistics and shot chart explorer built in React and React Router
- Users can select a player and see their season totals, shot charts, and stats by game
- Built reusable charts using D3.js
- Used Python and Pandas to manipulate the data into JSON

Markalytics   Jan 2021–Feb 2021

- A website and blog for a marketing and analytics company built in React and React Router
- Features a video background for desktops, hamburger menu for mobile, and a working contact form
- Built a paginated blog with articles

Education

Oregon State University   2015–2018

BS, Economics   Corvallis, Oregon
