EXPERIENCE

SneakerFlex   https://bit.ly/34vJ645   *may need a refresh

SneakerFlex is a full stack sneaker ecomerce store bulit in typescript for both front and backend, Nextjs, tailwind, urql, node, grapql, postgresql, and typorm. Users can Users can register, login, create, update and delete comments and create orders using Stripe as a payment handler.

HooptyDo   https://bit.ly/3vALhz2

HoopyDo is an NBA statistics and shot chart explorer built in React, Tailwind, and D3. The data is from nba_api and I used Pythons' Pandas library to manipulate the data. Users can select a player and see their season totals, shot charts and stats by game.

Markalytics   https://bit.ly/3c1YEAu

Markalytics is a website and blog for a marketing and analytics company built in React. It features a video background for desktops, hamburger menu for mobile, a working contact form, and a paginated blog with articles.

EDUCATION

Bachelor of Science Economics
Oregon State University
2015 - 2018

HOBBIES

🧠 Learning about neuroscience

🎨 Creating Art

ABOUT

Im a frontend developer with a passion for learning. My programing journey started after college while I was a family caregiver to my grandmother. Programing became a creative outlet for me. If you can think it, you can build it. That's what I love about programing

SKILLS

Coding

HTML CSS JavaScript
Typescript React Tailwind
D3 Node Express Graphql
Postgresql Python Pandas
